

Poke Ball V1

A Transformable Spying Robot

Collage : SUPREME KNOWLEDGE FOUNDATION GROUP OF INSTITUTIONS

Team Members :

- 1 . Shantanu Pal (Leader and Designer)
- 2 . Subhasish Kundu (Device Tester)

Why This Idea :

What Is Poke-ball : The name poke-ball comes from a cartoon series . In Our project Poke-ball is a transformable Robot used for spying purpose . It can transform from a 4inch ball into a four leg robot it has in-build night vision camera and microphone can run up-to one hour. Controlled by Wi-Fi tablet or PC .

Now why this idea , Think about a situation where unknown number of terrorist with unknown number of weapon hijack some passengers and the police do not have a way to go there . In This situation we can send our robot to examine the situation . Regarding that we can get into next steps .We just need to through the ball or roll it Towards the house , we can control the rolling as well as the walking, It will send all images and live videos via Wi-Fi to the controller

Purpose of This Idea :

The purpose of this idea is to spying on criminals or terrorist , it can be use full for army and police . There is some pictures bellow of poke-ball version 1 .
